

DATACARD® ID WORKS® BASIC IDENTIFICATION SOFTWARE

Designed for traditional ID programs, ID Works Basic identification software provides everything you need to ensure easy, efficient program management.

Essential tools for card design, production and management

Datacard® ID Works® Basic identification software includes the core tools that ID programs need to manage card design and production efficiently, as well as excellent flexibility for creating cards and handling images. It also allows you to easily upgrade to Datacard® ID Works® Standard or Enterprise software as your needs change.

Proven capabilities, effective performance

- **Powerful ID program management.** This software package enables you to create card and report designs, as well as manage image capture and printing. It introduces basic security features, such as a ghost option for the photo field. You can import and export data from Microsoft® Access databases, encode magnetic stripes and print bar codes. You can also create your own layout, field labels, color and graphics in production forms.
- **Flexible integration.** The application leverages all the features of Datacard® SP Plus Series card printers and integrates seamlessly with many other printer brands. It supports an array of DSLR cameras with the Datacard Capture Plug-in Tool, as well as TWAIN and Video for Windows image capture devices.
- **Intuitive interface.** The user-friendly interface features point-and-click navigation to simplify card design and production. Customizable sample templates and online documentation quickly turn new users into experts.

Standard Features

Flexible card, report and production form design

User-defined card size (CR50, CR80, Custom)

Auto-create production form

Shape drawing support

Font sizing and colors

Multiple field selection, alignment and formatting

Zoom in/out card design window

Zoom in/out report design window

Field types

Variable text (with masking)

Static text (with word wrap option)

Photo (with border, ghost or transparent background option)

Date (with time option)

Bar code (21 types)

Magnetic stripe

Static and variable graphic (with ghost and transparent color options)

Non-printable area

List

Composite

Print count

Auto sequence

Image management

In-production image import and export (.BMP, .EPS, .JPG, .PCT, .PCX, .PNG, .PSD, .TGA, .TIF, .WMF)

Image storage as BLOBs or files

Multiple images per record

View photos in table view

Database management

Auto-create Microsoft® Access 2000 database

Quick, advanced and stored searches

Database support

Microsoft Access 2000 and later

Help features

Online user's guide

Online help

Help desk support

Security features

USB hardware key

Application- or activity-level user security

Login timeout feature

Restrict project access by user

Secure user audit trail

Compatible with the extensive line of Datacard® card printers

Image capture options

File input

TWAIN capture devices

Video for Windows capture devices

Datacard Capture Plug-in Tool

System Requirements

Operating system

Microsoft Windows 2000, XP (32 or 64 bit), Windows Vista (32 or 64 bit), and Windows 7 (32 or 64 bit) operating systems

Web browser

Internet Explorer v6.0 or later

Memory

512 MB RAM

100 MB hard disk space for application (not including database)

Color

16-bit color (65,536 colors)

(Cameras may require higher color)

Resolution

800 x 600 screen resolution (1024 x 768 recommended)

Peripherals

CD-ROM drive

Available USB port
